

# CitroSperse™ Yellow Iron Oxide

## TECHNICAL DATA SHEET

Cosmetic-grade pigment dispersions in a patented silicone alternative emollient. CitroSperse™ Yellow Iron Oxide is a thick cream consistency, ready-to-use colorant suitable for use in a wide variety of color cosmetics applications within applicable regulations and limitations.

|                    |                                 |
|--------------------|---------------------------------|
| PRODUCT CODE:      | 276410                          |
| COLOR DESCRIPTION: | Yellow Iron Oxide               |
| INCI NAME:         | Iron Oxides and Polycitronellol |
| CARRIER TYPE:      | Polycitronellol                 |

| Properties                     | Specification             |
|--------------------------------|---------------------------|
| Hegman Grind:                  | ≥ 6                       |
| Density (LB/GAL)               | Report                    |
| Viscosity (CPS):               | Report                    |
| Pigment Percent:               | Calculated                |
| Appearance:                    | Yellow Paste              |
| Odor:                          | Characteristic            |
| Color (DE, DL, Da, Db):        | To Match Standard         |
| Strength (%)                   | 95-105                    |
| FDA Guidance For Pigment Type: | <u>21 CFR Part 73.225</u> |

Best stored in original sealed container in a cool location out of direct sunlight. Product may require agitation or mixing prior to use.
