

Elix-KON CHG20

INCI Chlorhexidine digluconate
CAS 18472-51-0

SPECIFICATIONS

Appearance Almost colorless or pale yellowish liquid
Assay (%) 19 – 21

GENERAL INFORMATION

Elix-KON CHG20,, is a disinfectant with antiseptic effect against a broad spectrum of microorganisms such as gram-positive and gram-negative bacteria, and also against fungi.

Elix-KON CHG20 is a topical antimicrobial agent and disinfectant used to treat fungus, bacteria and other skin infections. In cosmetic formulations it is mainly used as an antiseptic, an oral care agent and / or preservative active.

As a biocidal agent, Elix-KON CHG20 helps cleaning the skin and eliminating odors by destroying the growth of microorganisms.

Elix-KON CHG20, is widely used in different oral care applications due to its ability to eliminate plaque formation.

As an ingredient with antibacterial properties, Elix-KON CHG20 is also a very effective preservative that protects a cosmetic formulation from contamination and spoilage. In deodorants it can play an active role in reducing the proliferation of bacteria responsible for body odor.

Elix-KON CHG20, can be found in various personal care products such as mouthwash, hair dye, foundation, anti-aging treatment, facial moisturizer, sunscreen, eye make up, acne treatment, exfoliant/scrub, cleanser and after shave.

APPLICATIONS

Fragrances
